

UNDERSTANDING LABOUR MARKET INFORMATION

The Far Northeast Training Board (FNETB) in partnership with Statistics Canada will be hosting a full day Labour Market Information (LMI) workshop. If you are interested in participating in this full day training session, free of charge, on how to access and use census data, please complete and return the attached registration form.

Morning Session

As part of the Census Dissemination Program, Statistics Canada is undertaking community outreach in various areas of Ontario in order to demonstrate the wealth of socio-economic information available to you on the Statistics Canada web site. Peter Pathinather from the Toronto office of Statistics Canada will provide a 3-hour workshop to community based organizations in our region.

This workshop will cover the following Topics:

- Introduction to Census and Census Concepts - 30 minutes
- Census geographies – 30 minutes
- How to navigate www.statcan.gc.ca (Community Profiles, Census Trends, GeoSearch, Topic-based Tabulations)
- Case studies

Presenter:

Peter Pathinather is the Project Manager for the Community Outreach Program in Central Region. He has been with Statistics Canada for over 13 years and held a number of positions. He has extensive experience providing Statistics Canada workshops to data users from public sector and community based organizations.

Afternoon Session

The FNETB's participation in these workshops stems from Working Together: A Local Labour Market Plan. In the plan the FNETB proposes to deliver LMI workshops to help local stakeholders fully understand labour market indicators and their impact on the local labour market and on the overall economy, and how to use that information in the context of evidence-base planning. Workshops will be held in each of the six Community Futures Development Corporations (CFDC) regions within the FNETB's catchment area.

We are inviting you and/or another person from your organization to this workshop. The workshops would be of interest to policy planners, researchers, community advocates and other individuals who may use census data to analyze trends.

Organized by:

The Far Northeast Training Board (FNETB)

In partnership with:

Collège Boréal

NORTHERN COLLEGE

the Far Northeast Training Board (FNETB) is funded by: **EMPLOYMENT ONTARIO**
